Education

2013 - 2017

Infotechnology engineering
José Cecilio del Valle University

2009 - 2010

Graphic design
Level Seven Studio

Languages

Spanish

English (B1 level & i continue learning)

Soft Skills

Teamwork

Creative thinking

Problems resolution

Empathy

Hi there!

My name is Víctor Alvarado

I'm a software engineer based in Honduras with 5 years of experience in the software industry developing web and mobile applications for different national and international companies. I'm currently dedicated to design and development web platforms using different technologies like ReactJs, Laravel, NodeJs, MongoDB, MySql, NextJs and Yii2 framework.

Work Experience

Lead junior programmer

Present Network Specialist PRO's/ EEUU

I'm working with Yii2 PHP framework to create different platforms like e-commerce, landing page, report tools integrating different payments gateway, recurrent subscriptions, credit cards payments and others types of functionalities.

FrontEnd & Android developer

2018 - 2020 Beanario Software / Honduras

I worked in the development of different web applications and i also developed different Android applications with Java & Firebase. UI design and web design.

Full stack developer

2017-2018 PaperSoft / Honduras

Support, maintenance and creation of new functionalities for an ERP system. Creation a survey and reporting systems.

Full stack developer

2015-2017 Credito Solidario / Honduras

Development of a credit management platform for the presidential program Credito solidario, landing page and web design.

Languages and technologies

- **PHP (Laravel, Yii2)**
My "native" programming language for the web, I've worked with it for over 3 years. I've used it in the front-end and back-end with Laravel or Yii2 frameworks for Dashboard apps, credit management systems and others types of webs systems
- **JavaScript (React Js, Next Js, Node Js)**
My favorite programming language for the web, I've worked with it for over 1 year. I've used it in the front-end with React, in the back-end for APIs with Node, Express.
- **Java (Android)**
I've worked with it for over 5 years on Java programming language. I've used it in the personal apps like Simpypaper - Wallpaper or Startups like Ocho App or CsMovil app in Credito Solidario.
- **MySQL and MongoDB**
I've used it in the database management.
